SUMMARY

Software Developer with hands-on experience building and deploying full-stack web applications using Python, Django, PHP, and Laravel. Developed projects including taxi booking platforms, digital marketplaces, automation tools, and e-commerce systems. Skilled in backend development, RESTful APIs, database design, authentication systems, PostgreSQL, MySQL, AWS deployment, Git, Linux, Redis, Celery, and scalable web application development. Strong foundation in data structures, software engineering principles, and problem-solving.

WORK EXPERIENCE

Freelance Web Developer

Dec 2024 – Present

- Delivered 7 websites for clients across multiple industries using WordPress, PHP, HTML, CSS, and JavaScript.
- Managed client communication, requirement gathering, customization, deployment, and maintenance.
- Implemented responsive designs, SEO improvements, and business-focused website solutions
- Currently developing a Laravel-based application with custom backend functionality and database-driven workflows. Consistently deliver scalable, business-focused solutions within project timelines.

EDUCATION

Masters of Computer Applications

Aug 2025 - Present

Amal Jyothi College Of Engineering Kottayam

Bachelor of Computer Applications

Jun 2022 - Mar 2025

Mahatma Gandhi University Kerala

CGPA: 7.82 Grade: A

Final year project on "Taxi Booking system using Python Django".

FULL STACK PROJECTS

- Velora** – Built a digital art marketplace using Django, MySQL, Redis, Celery, AWS, and Razorpay. Implemented role-based access control, OTP authentication, escrow-based payments, dispute management, order lifecycle tracking, and artist-client collaboration workflows.
- SwiftRide** – Developed a multi-role taxi booking platform using Django, supporting passengers, drivers, and administrators. Implemented driver approval workflows, vehicle management, OTP-based ride verification, dynamic pricing, trip lifecycle management, location-based ride requests, and review systems.
- FreshCart** – Built an e-commerce platform using Django with user authentication, product management, shopping cart functionality, order processing, address management, and role-based workflows for customers, sellers, and delivery agents.
- Copper** – Developed a custom programming language from scratch, implementing lexical analysis, parsing, syntax handling, and code execution concepts to explore compiler and interpreter design fundamentals.

SKILLS

- Languages: Python, PHP, JavaScript, HTML, C, C++, Java
- Frameworks & Libraries: Django, Laravel, React
- Web & Tools: REST APIs, WebSockets, Celery, Redis
- Databases: MySQL, PostgreSQL, MongoDB
- Developer Tools: Git, GitHub, VS Code, Linux, Docker
- AI-Assisted Development: Cursor, Stitch, Antigravity

ACHIEVEMENTS

- Built 15+ full-stack web applications and automation tools
- Delivered 7 freelance websites for real-world clients
- Solved 130+ coding problems on LeetCode
- Selected as Global Nominee for NASA Space Apps Challenge
- 2nd Prize – Idea Pitching Competition, MES College
