SUMMARY

Backend Software Developer with experience designing and building scalable web applications using Python and Django. Strong foundation in data structures, algorithms, REST API development, database design, and software engineering principles. Passionate about solving complex problems, writing clean, maintainable code and building reliable backend systems.

EDUCATION

Master of Computer Applications (MCA) Aug 2025 – Jun 2027
Amal Jyothi College of Engineering (Autonomous), Kanjirappally CGPA: 8.93/10

Bachelor of Computer Applications (BCA) Jun 2022 – May 2025
MES College, Erumely CGPA: 7.82/10

EXPERIENCE

Freelance Software Developer Dec 2024 – Present
Self-Employed

- Delivered 8 WordPress websites for businesses across multiple industries, including customization, deployment, and ongoing maintenance.
- Developed a Laravel-based web application for a college-sponsored project, implementing authentication, role-based access control, backend functionality, and relational database design.

PROJECTS

Noir | GitHub | *Go, Python, Django, Docker, WebSockets, Redis, Cobra* Jul 2026 – Present

- Developed an automated chaos engineering platform executing 6 Docker fault types with guaranteed rollback.
- Built an event-driven architecture using Django Channels, Redis, and WebSockets to stream live logs, calculating P95/P99 latencies, 3-sigma anomalies, and RTO metrics.
- Implemented a Go Cobra CLI daemon with Docker SDK, validating resilience across 255 tests.

Velora | GitHub | *Python, Django, Docker, Redis, MySQL, AWS* Apr 2026 – May 2026

- Built a digital art marketplace using Django with role-based authentication, escrow-based payments, dispute management, Redis caching, and AWS deployment.

Copper | GitHub | *C, Compiler Design* Feb 2026 – Mar 2026

- Developed a custom programming language from scratch, implementing lexical analysis, parsing, syntax handling, and code execution concepts to explore compiler and interpreter design fundamentals.

SwiftRide | GitHub | *Python, Django, Docker* Feb 2025 – Apr 2025

- Developed a Django-based taxi booking platform with multi-role authentication, OTP ride verification, dynamic pricing, trip lifecycle management, and location-based ride requests.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, PHP, HTML, CSS
Frameworks & Libraries: Django, Laravel, React.js, WordPress, Django REST Framework, Celery, Redis
Databases: PostgreSQL, MySQL, SQLite, MongoDB
Developer Tools: Git, GitHub, Docker, Linux, VS Code, PyCharm, Postman
Technologies: REST APIs, WebSockets, JWT Authentication, OAuth 2.0, AWS, Razorpay

ACHIEVEMENTS

- Secured 1st Place in Clash of Codes, a multi-round competitive programming contest organized by St. Joseph College of Engineering and Technology, Palai.
- Secured 1st Place in Algorion, an algorithmic programming competition conducted as part of Samyuktha 10.0 at Saintgits College of Engineering.
- Global Nominee, NASA Space Apps Challenge 2025.
- Participated in the AICTE-MIC Innovation, Design, and Entrepreneurship (IDE) Bootcamp 2025 organized by the Ministry of Education.
