SUMMARY

Full Stack Developer with strong backend expertise in Python, Django, PHP, and Laravel. Experienced in building and deploying scalable web applications, REST APIs, authentication systems, and database-driven solutions. Developed production-ready projects including a digital art marketplace, taxi booking platform, and e-commerce application, with hands-on experience in AWS deployment, PostgreSQL, MySQL, Redis, Celery, Git, and Linux environments.

WORK EXPERIENCE

Freelance Web

Dec 2024 – Present

Delivered 7 freelance web development projects for clients across various industries, building and deploying production-ready websites. Experienced in client communication, requirement analysis, hosting, and website maintenance. Currently developing a Laravel-based application with custom backend functionality and database-driven workflows. Consistently deliver scalable, business-focused solutions within project timelines.

EDUCATION

Bachelor of Computer Applications

Jun 2022 - Mar 2025

Mahatma Gandhi University Kerala

- CGPA: 7.82 Grade: A
- Final year project on "Taxi Booking system using Python Django".

Masters of Computer Applications

Aug 2025 - Present

Amal Jyothi College Of Engineering Kottayam

FULL STACK PROJECTS

- Telegram Bot for finding job post by scanning resume and scrapping data from job posting websites
 - Built full-stack e-commerce platform with Django, supporting user authentication, cart, and order management
 - Copper - A programming language build from scratch
 - Velora - Built and deployed a production-ready digital art marketplace using Django, MySQL, AWS, Razorpay, Celery, and Redis. Implemented escrow-based payments, dispute management, OTP authentication, role-based access control, and complete order lifecycle workflows, providing a secure platform for artists and clients to collaborate.
 - RideNow –Developed a multi-role taxi booking platform supporting passengers, drivers, and administrators with OTP-based ride verification, dynamic pricing, and trip lifecycle management.
-
